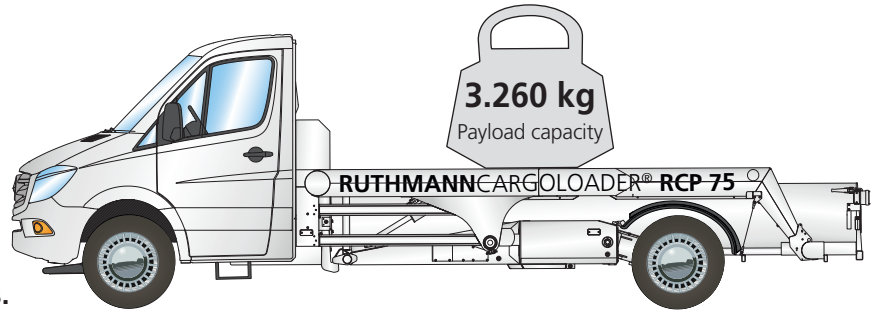
RUTHMANNCARGOLOADER® **RCP 75**

lifting – lowering – loading – unloading – transporting – changing
Maximum convenience and easy handling.

Examples of the many different transport possibilities:

- Freight
- Machinery and equipment
- Parts at production facilities
- Food logistics
- Fork lift trucks with low ground clearance
- General cargo distribution
- Cable reels
- Garbage and bulk goods with tilting mechanism
- Distribution of goods from central warehouses
- Hospital supply logistics
- Transport of patients
- Waste container logistics
- ...
- and for your very own special assignments!



The RCP 75 is also the perfect interim storage facility when distributing goods.

CARGOLOADER® **RCP 75**

Lifting – lowering – loading – unloading

Greater versatility and driving efficiency.

Maximum load capacity. Minimum loading time.

Loads of up to 3.26 t or sensitive goods can be a logistic challenge. Limited factory space and increased handling capacity require versatile transportation and distribution solutions at every level. Ramps and even stairs must be accessible.

We offer cost-effective solutions.

With the new CARGOLOADER® **parallel RCP 75**, we provide a versatile and cost-effective logistic solution. This model features a greater payload capacity, superb handling, a great variety of special equipment and optional accessories, and time-tested **RUTHMANN** quality.

Due to many different application possibilities, fleet costs can be reduced significantly. The incredible versatility is what sets CARGOLOADER® vehicles apart from conventional delivery vans.*

The entire cargo area on the CARGOLOADER® **parallel** can be raised or lowered within seconds. It can be loaded/unloaded at ground level or at ramps up to 1.6 m in height.

*The amazing efficiency is confirmed in an independent study carried out by the University of Münster. The results of this study are overwhelming. To learn more, visit: www.cargoloader.de

Technical specifications of the **RUTHMANN**CARGOLOADER® **RCP 75**:

	Gross vehicle weight (GVW)	7,490 kg
	Payload capacity	3,260 kg
	Cargo area height smoothly adjustable	0-1,600 mm
	Floor height in drive position	460 mm

	Interior length of cargo area (customized to suit individual needs)	4,500 mm
	Maximum interior width of cargo area (with standard overall width of 2,550 mm)	1,820 mm
	Interior height of cargo area	600 mm
	Maximum loading height (without special permit)	3,540 mm

■ All weights and measures are approximate and refer to standard basic equipment. Subject to technical modifications.

New front end in the transport vehicle category – with special features to suit individual customer requirement –

Discover the typical RUTHMANN advantages.

- **Reduced loading time:**
  Load/unload goods at every level without the tedious lifting procedures. Lift and lower the entire cargo area to ground level within seconds.
- **Reduced labour costs:**
  Loading/unloading can be done by just one person because of easy access at ground level and smooth adaptation at loading ramps.
- **Amazing versatility:**
  Unprecedented versatility regardless of the many different loading conditions.
- **Safe handling:**
  The practical dimensions and easy handling of the **RCP 75** ensure that goods are loaded and unloaded in the most efficient and safest way possible.
- **Low-maintenance lift technology:**
  At the push of a button, the cargo area can be smoothly raised and lowered hydraulically from approx. 0 mm - 1,600 mm.
- **Transport:**
  With the **RCP 75**, transporting bulky and tall objects is easy and straightforward.
- **Individual:**
  The units are tailored to suit the individual requirements of our customers.
- **Quality:**
  High quality and durability are hallmarks of the **RCP 75**.

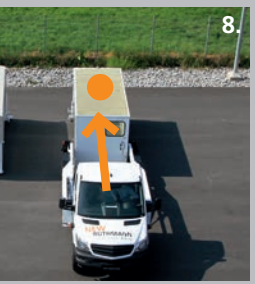
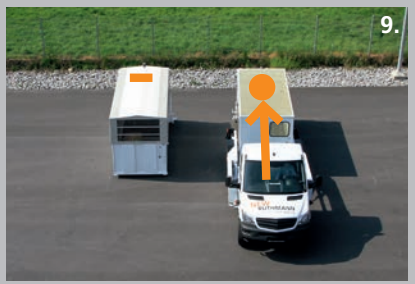
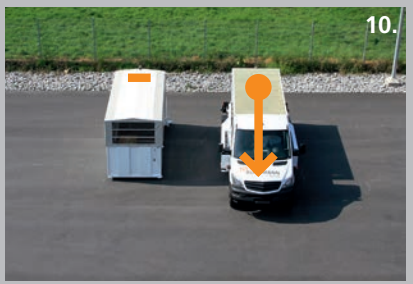
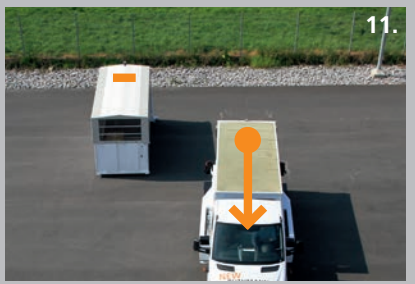
be used as interim storage/supply facilities - Simulation of the interchangeable cargo area mechanism -





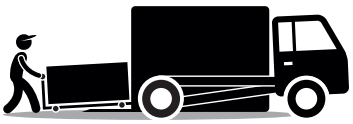




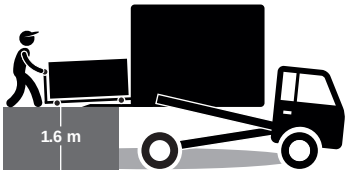
Transporting – changing

Transport items quickly, safely, and efficiently – up to 3,260 kg payload capacity.

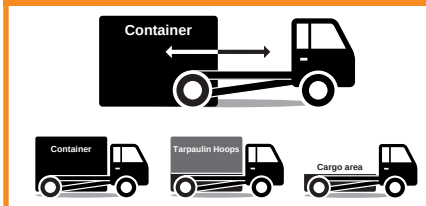
Loading and unloading



lowering The entire cargo area is lowered to ground level



lifting The entire cargo area is raised horizontally



changing Diverse cargo areas/ containers can easily be interchanged

! Labour-intensive and time-consuming loading/unloading procedures are now a thing of the past

The same cargo areas and containers, used previously on the **RCP 80,** can also be **utilized and interchanged** on the **RCP 75.** Logistic companies, fire departments and many others will find this particularly useful.

The features on the base vehicles are determined by individual customer needs and requirements. **The interchangeable cargo areas and wide variety of accessories provide the perfect solution for every conceivable job requirement.**

Compact, versatile and cost-effective!

With a load capacity of 3,260 kg and a GVW of 7,490 kg, every kind of item imaginable can be transported safely and efficiently. In addition, the **RCP 75** can be driven by holders of class 3/C1 driver's licences.

Professional logistic companies require reliable and versatile transport vehicles and the **RCP 75** fulfills this need perfectly.

The **RCP 75** – which meets the new EURO 6 emission standards – is a time-tested "problem solver". Due to the great variety of interchangeable body modules and accessories available, the **RCP 75** is absolutely perfect for internal distribution tasks and everyday transport assignments.
