

# RUTHMANN CARGO LOADER® TRAILER

## RCPT 140 and RCPT 155

## Lifting/lowering/loading efficiency for short-distance routes

### Examples of the many different transport possibilities:

- Machinery
- Freight
- Extremely tall equipment can be transported with the cargo area height set at just 280 mm in travelling position
- General cargo/freight distribution
- Parts for production facilities
- Cable reels
- Forklift trucks (deliveries, demonstrations, rental businesses, etc.)
- Distribution of goods from central warehouses
- Waste container logistics
- Combinable with every suitable, standard truck
- Perfect addition to any fleet of special transport vehicles
- ...
- Perfect for your own individual assignments

Switch to maximum versatility and efficiency.

With its CARGO LOADER® RCPT 140/155 models, **RUTHMANN** is able to provide the transport industry with **semi-trailers that are exceptionally effective**. These trailers are **especially useful on short-distance routes** where **heavy goods need to be loaded and unloaded frequently**.

Due to its **unique design**, the entire cargo area on both models can be lowered to ground level. It can also be raised horizontally to a **height of 1.6 m** for easy loading/unloading at loading ramps. Reference customers used on this special feature for a great variety of tasks including forklift and machinery transport.

Whenever heavy or tall goods need to be transported on short-distance routes, loading and unloading is often a very complex and time-consuming procedure. Our CARGO LOADER® models provide the perfect solution.

Because of the **low-lying floor** (minimum of 280 mm) **in travelling position**, CARGO LOADER® models are able to transport large items such as forklift trucks with **max heights to 3.7 metres**.

Another decisive advantage of the CARGO LOADER® RCPT 140/155 lies in their amazing versatility. So many different tasks can be carried out using only one vehicle.

Discover the typical **RUTHMANN advantages**.

### ■ Reduced loading time:

Load/unloads goods at every level, without the tedious lifting procedures. Lift and lower the entire cargo area to ground level within seconds.

### ■ Reduced labour costs:

Loading/unloading can be done by just one person because of easy access at ground level and smooth adaptation at loading ramps.

### ■ Amazing versatility:

Unprecedented versatility regardless of the many different loading conditions.

### ■ Safe handling:

The practical dimensions and convenient handling of the RCPT 140 and RCPT 155 ensure that goods are loaded and unloaded in the most efficient and safest way possible.

### ■ Low-maintenance lift technology:

At the push of a button, the cargo area can smoothly be raised and lowered hydraulically from approx. 0 m to 1.6 m.

### ■ Transport:

The RCPT 140 and RCPT 155 can easily transport bulky and extremely tall objects of up to 3.7 m without a special permit.

### ■ Unique:

The units are tailored to suit the individual requirements of our customers.

### ■ Quality:

High quality and durability are hallmarks of the RCPT 140 and RCPT 155.

\*The amazing cost effectiveness is confirmed in an independent study carried out by the University of Münster. The results of this study are overwhelming. To learn more, visit [www.cargoloader.de](http://www.cargoloader.de)

Minimum loading time.

## RUTHMANNCARGOLOADER® TRAILER

RCPT 140 and RCPT 155

The conventional cargo area is large and sturdy enough to transport vehicles, and forklifts. It can also accommodate refrigerated containers for food & beverages deliveries, and plywood containers for weather-sensitive goods. **RCPT140/155** models are simply ideal for manufacturers, retailers, and municipalities.

The **RCPT 140** has a **gross vehicle weight (GVW)** of **10,425 kg** and a generous **6,400 kg payload capacity** while the **RCPT 155** features a **12,000 kg GVW** and an impressive **8,000 kg payload capacity**. On both models, the **standard cargo area** is **5.25 m** in length. The **cargo area** on the **RCPT 140** is **1.74 m wide** and on the **RCPT 155** it is **1.64 m wide** (with an overall width of 2.55 m).

The new CARGOLOADER® semi-trailers are compatible with **every suitable standard truck**. Special additional equipment is not required. Efficiency and versatility are maximized.

**Transport items quickly, safely, and efficiently –  
8,000 kg payload capacity**

### Facts & Information: RUTHMANNCARGOLOADER® TRAILER

	RCPT 140	RCPT 155
Payload:	6,400 kg	8,000 kg
Gross vehicle weight (GVW):	10,425 kg	12,000 kg
Infinitely variable lifting height:	0-1,600 mm	0-1,600 mm
Floor height in drive position:	580 mm SA 280 mm	580 mm SA 280 mm
Interior length of cargo area: (customized to suit individual requirements)	5,250 mm	5,250 mm
Maximum interior width of cargo area: (with standard overall width of 2.55 metres)	1,740 mm	1,640 mm
Interior height of cargo area: (customized to suit individual requirements)	600 mm	600 mm
